Folder Creation

When invoking a Preset, a dialog will appear to allow you to fill in the desired info, as predicated on your tag variables. After invoking one of the three options, your new hierarchy will simply and easily be created in its assigned Archive Folder or even on your Desktop.

To use variables, when creating your Preset, surround words in braces to create a variable, like this: {Variable Name}.

If you put 'auto' at the beginning of your variable ('{Auto Variable Name}'), the contents of it will be remembered between invocations. Asnd if it's a number, it will be incremented before each invocation.

Variables can be named anything you wish, and an unlimited number of variables can be used in each preset.
